

MARIUSZ MRUK

Project Manager — Technical Delivery Lead

PROFILE

Project Manager and Technical Delivery Lead with a hands-on engineering background (Angular, Ionic/Capacitor, NestJS). I guide cross-functional teams to deliver web and mobile products end-to-end: discovery, scoping, roadmaps, release planning, risk/issue management, and stakeholder alignment. I translate business goals into actionable backlogs, ensure quality via CI/CD and code reviews, and make pragmatic architecture decisions grounded in real-world constraints.

PROFESSIONAL EXPERIENCE

Operations Manager & IT Lead — Freelance

May 2025 – Aug 2025, 4
mos

Escape Room Project

Operations & Technology Management

- Managed operations and led IT delivery across **Astro** frontend on **Vercel**, **Supabase** DB, and **NestJS** backend on **Render**.
- Maintained project documentation: business plan, financial model, and story bible; set up **Jira/Notion** workflows and dashboards.
- Planned scope and releases; coordinated tasks, mitigated risks, and ensured on-time delivery.

Architect / Product Owner

Jul 2023 – Sep 2024, 1 yr 2 mos

SafetyApp sp. z o.o.

SafetyHab – Organization Digitalization System

- Defined requirements and product backlog; led Scrum ceremonies and stakeholder alignment.
- Built and governed SDLC documentation; owned delivery and release planning.
- Led **Angular** component library development; coordinated **Astro** web components and mobile security (**Ionic** + **Keycloak**).

Technical Project Manager

Jul 2022 – Sep 2023, 1 yr 2 mos

Retalk sp. z o.o.

LureForReal – Dating App

- Led estimation, roadmap and release plan; coordinated tasks and delivery across teams.
- Oversaw testing and quality gates; mentored technically on stack decisions (**NestJS**, **GraphQL**, **PostgreSQL/Prisma**).
- Managed release approvals and stakeholder communication; balanced scope, budget, and timelines.
